Tree Maintenance to Protect Overhead Power

Every 4 to 6 years Puget Sound Energy maintains trees in Medina which affect their overhead powerlines. During the recently extended work period of October 7th to October 31st, Puget Sound Energy will be having trees trimmed around all overhead power transmission and distribution lines in Medina. PSE's contractor is Asplundh Tree Expert Company, a Washington State licensed and bonded contractor.

Work Hours / Noise: Asplundh will start work at 7:00am and stop work at 4:00pm, Monday through Friday.

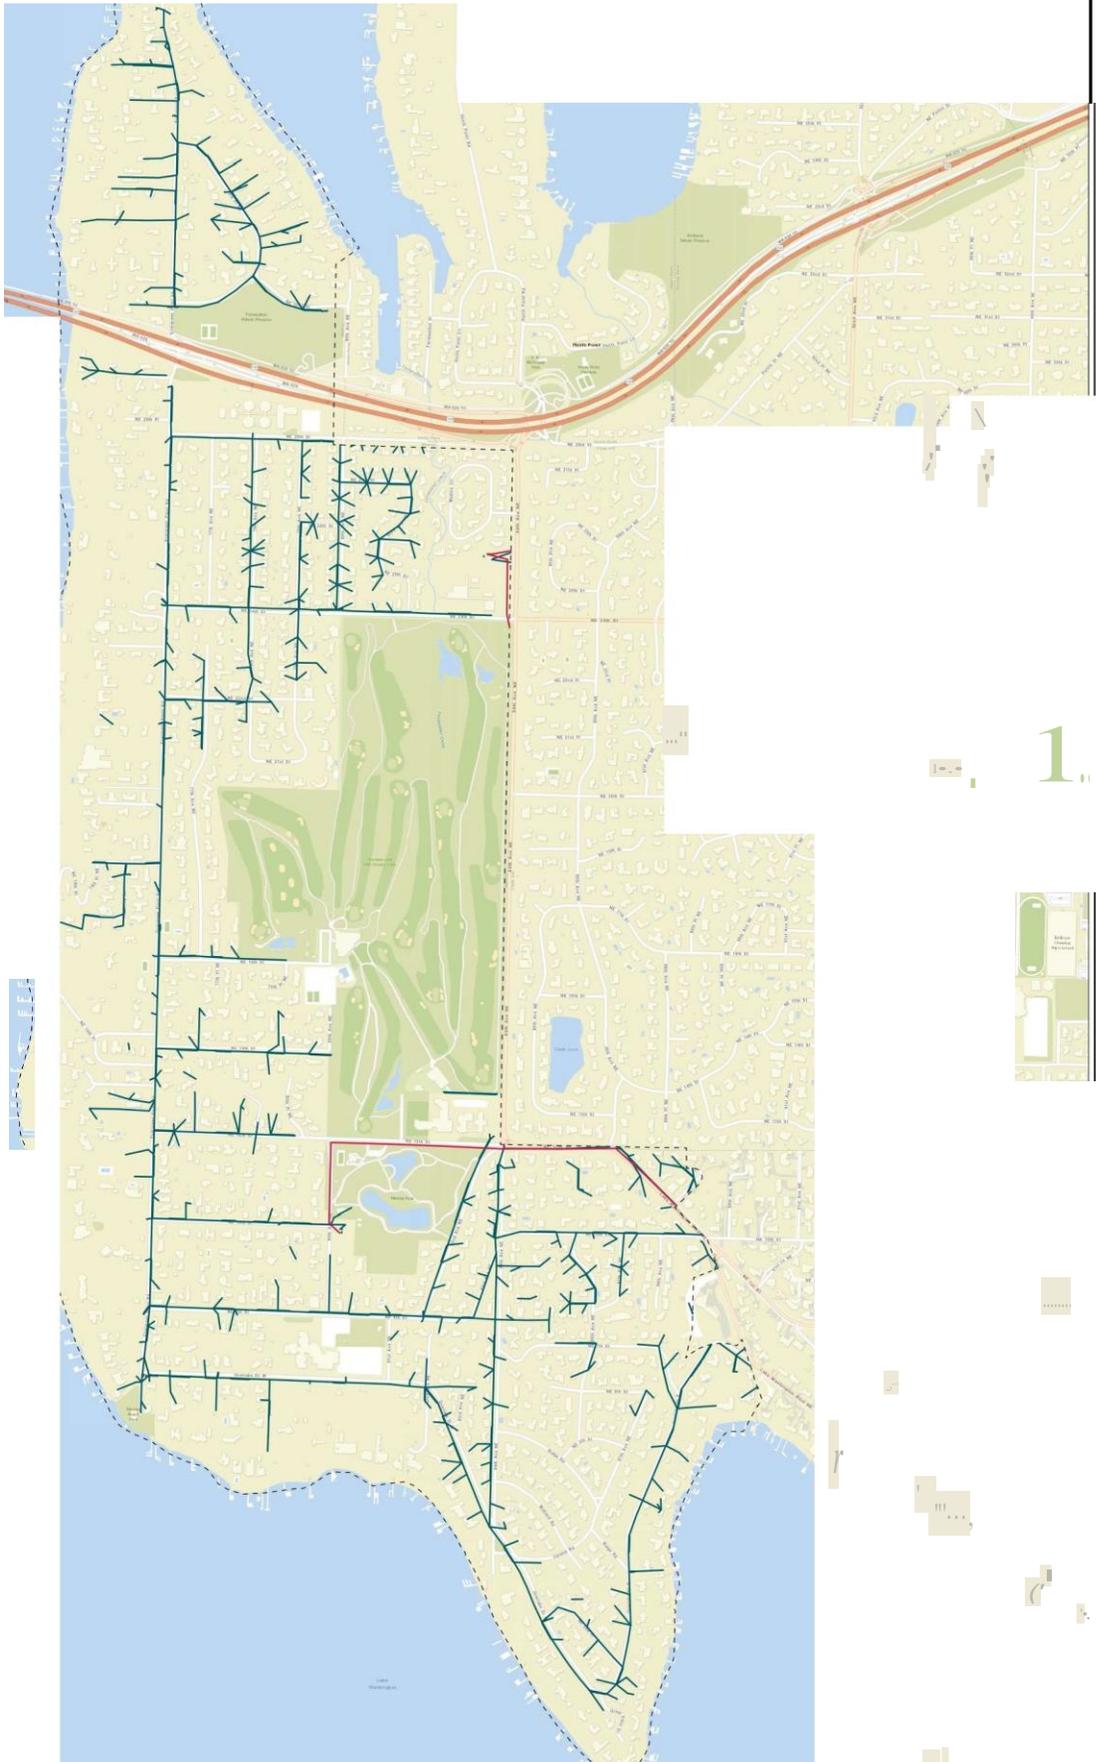

ROW Use: Asplundh will use traffic control as necessary. All worksites and traffic control will be set up every morning and will be taken down and cleaned up every afternoon.

Scope of Work: The trimming will occur within the wire zone which is the area within a 10-foot radius around power transmission and distribution utility lines. The trimming will include tree limbs that are growing within the wire zone as well as branches likely to grow into the wire zone and interfere with power lines in between the clearance pruning cycles of work, typically four to six years.

Residential Requests: Asplundh is not authorized to accept additional work to the powerline trimming, such as additional pruning or removal of trees at the request of residents. They are required to stay within the scope of work set by their contract.

City Contact: Please direct your questions, concerns, and any other communications directly to the Medina Deputy Building Official, who will be acting as the liaison between residents and PSE/Asplundh:

Rob Kilmer
